Harrison Muhoro

Software Developer · Laravel & React · Nyeri, Kenya

harrison.wasmer.app · github.com/harrisonmuhoro · zionh191@gmail.com

Profile

Software Development diploma student at Nyeri National Polytechnic building Laravel and React systems for Kenyan healthcare, hospitality and TVET. Strongest in role-based access control, branch and department data isolation, and backend security. Seeking an internship or junior developer role.

Projects

Afya HMS — Multi-branch hospital management system · GitHub

Laravel · React 18 · TypeScript · Vite · MySQL · Redis · Docker · Sanctum · Google OAuth

- Designed a modular-monolith platform covering EMR, patient queues, billing, pharmacy and lab, with a 10-role permission system enforced per API route.
- Enforced branch-level patient data isolation with a Laravel global scope.
- Found missing policy enforcement on Patient routes during my own review and closed it with authorization policies.
- Wrote the architecture documentation in the repo: canonical decisions, PRD, SRS, database ERD and API specification.

Taara HMS — Hotel management system · GitHub

Laravel 11 · PHP 8.3 · Blade · TypeScript · Vite · MySQL · Resend

- Built reservations, front desk, housekeeping, maintenance, restaurant POS with charge-to-room billing, inventory and financial reporting in one server-rendered app.
- Added tiered rate limiting (5 attempts per 15 minutes per account, 20 per IP) with auto-lockouts and an admin override.
- Added audit logging on all financial mutations, security headers, and queued PDF/CSV report exports.
- Covered financial integrity and concurrency cases with PHPUnit and Pest tests.

InduTrack KE — Industrial attachment management platform · GitHub

Laravel 11 · React · Vite · Tailwind · MySQL · Sanctum

- Built a five-role portal (student, company supervisor, institution supervisor, institution admin, super admin) covering placement, weekly logbooks and final evaluation.
- Implemented logbooks that lock after 72 hours, scheduled reminders and escalations for missed entries, and PDF completion certificates.
- Added opt-in two-factor authentication and API rate limiting.

Vuka — Attachment and internship portal for a county-style department structure · GitHub

PHP · MySQL · Vanilla JS · Bootstrap

- Built a four-role RBAC system with department-scoped data; roles are re-verified from the database on every request.
- Implemented the vacancy approval workflow, application status pipeline, audit log and CSV export.

Experience

IT Support Attachment Student — Nyeri County Government, Department of ICT

September 2025 – November 2025; returned September 2026 – November 2026 (current)

- Provided day-to-day IT support to department staff: diagnosing and resolving hardware, software and connectivity issues.
- Configured computer systems and peripherals for county government users.
- Assisted with routine maintenance and troubleshooting of ICT infrastructure.

Education

Diploma in Software Development — Nyeri National Polytechnic (TVET CDACC), 2024 – expected March 2028

Kenya Certificate of Secondary Education — Mayori Secondary School, 2023, Grade B−

Certifications

- Data Analytics Training — ICT Authority Kenya with Sigma Digital Technical Institute, July 2026

- Responsive Web Design — freeCodeCamp, 2023
- Back End Development and APIs — freeCodeCamp, 2024
- Microsoft Azure Fundamentals (AZ-900) — in progress

Skills

Backend: PHP 8, Laravel, MySQL, REST API design, queues and scheduled jobs

Frontend: React 18, TypeScript, Vite, Tailwind CSS, Blade, Bootstrap, vanilla JavaScript

Security: RBAC and policies, rate limiting, audit logging, Sanctum, two-factor auth, Google OAuth

Tools: Git, GitHub, Docker, Linux/Ubuntu, PHPUnit, Pest

Mobile: Kotlin, Jetpack Compose (basic)

Volunteer

Audio-Visual Technician — Deliverance Church International Skuta. Run sound, mixing, projection and live production for services and events.

Languages: English (fluent), Kiswahili (native)
