PROFILE

Software engineer building production-ready enterprise systems: backend architecture, performant web applications, and maintainable software for healthcare, operations, and business teams across Africa.

CORE SKILLS

Backend: PHP, Laravel, Node.js, REST APIs
Frontend: React, TypeScript, HTML5, CSS3
Database: MySQL, PostgreSQL, MongoDB
Cloud/Ops: Microsoft Azure, Docker, CI/CD, Nginx
Tools: Git, GitHub, VS Code, Postman

SELECTED PROJECTS

Afya HMS - Hospital Management System

Role-aware system centralizing patient records, billing, queues, and department handoffs. Stack: PHP, Laravel, React, MySQL.

KenAI - NLP Analytics Platform

Dashboard turning unstructured Swahili text into structured insights via replaceable ML services. Stack: TypeScript, Node.js, Python, Redis.

Student Internship Portal

Centralized, role-based application management replacing manual tracking. Stack: HTML, CSS, JavaScript, PHP.
